The Night Jaguar is the latest in night vision binoculars. A comfortable ergonomic design makes the Night Jaguar one of the best-looking Night Vision Binoculars on the market. However, since looks aren't everything we used two top of the line 1st gen plus light intensifier tubes with super fast optics to make the Night Jaguar not only a great looking unit but the best functioning 1st gen binocular there is. New dual illuminator! With a push of a button you can select either a short range wide illumination or super long range mode.
